COMPANY DESCRIPTION:

The F1 has been dominating the tournament scene for years. It is known for its smooth and predictable performance. Moderately sharp forebody bevels work in conjunction with the large sweet spot to provide a smooth, non-critical turn. There is no question that the ski will get you wide and early. Clean, smooth and fast, the F1 delivers on all points. A perfect blend of carbon graphite and fiberglass gives you light weight and durability that will outlast any carbon ski on the market. 41 off is no stranger to the F1. New school, old school, the F1 is known for being very fast, very smooth and has a failure rate of 0.00%.
