## **COMPANY DESCRIPTION:**

Young superstar Harley Clifford is as diverse of a rider as they come. He wins nearly every contest he enters, is blowing minds with his freeriding and kills it on rails. His board needs to be fast, carve hard and give him the boost that he needs to land the next "never done before" trick. The Harley does all of this and more! Step up your game with the Harley! Aggressive 3-stage rocker gives a straight up boost off the wake. The Harley has Triple Concave into Quad V Channels..Triple Concave is provided for pillow-soft landings with continued speed and never ending flow., while the Quad V channels create fast rail to rail edging and grip. It has low volume, variable-edge rails so it is Faster on edge with more hold; smooth and catch-free through the middle. The Carbon-X Configuration (+-45) is designed within Harley's specifications, this X increases torsional rigidity through the control zone of the board. Small RX Quad Fin Setup are short, low-profile blades for low drag and superior control.

The 2012 **Harley Binding** Considered the best rider in the world today by most of his peers, Harley's smooth, yet freakish athletic style requires a supportive binding with precision flex and control. Our hottest selling pro model boot has been re-designed this year giving Harley and all riders a lower, more responsive ride. Whether or not you're the best rider in the world, the Harley Boot will give you all you need to improve your riding and feel like a champ!
